LIBRARY

RESTRICTED—THE INFORMATION IN THIS REPORT IS NOT TO BE COMMUNICATED DIRECTLY OR INDIRECTLY TO THE PRESS OR TO ANYONE NOT IN THE ARMED FORCES

ADMISSION RATES—ALL CAUSES AND RESPIRATORY DISEASES

CONTINENTAL LIMITS OF THE UNITED STATES—1944, 1945, 1946

CURRENT TRENDS

Week Ending 11 May 1946

The curve representing admission rate for All Causes shows an upturn this week, with a rate of 668, which is 4 per cent higher than last week's rate of 643. During the corresponding period in 1945, the rate was 655. The 9th District continues to lead the continental United States in admission rate, and its current rate of 935 is 6 per cent above last week's report. The 7th District again has the lowest rate, in spite of a 25 per cent increase over its last week's report. Increases of 10 per cent to 17 per cent were also registered in the 6th, 11th, 12th, and 13th Districts. Improvement in rate was experienced in the 5th District, where the current rate of 762 is 10 per cent below last week's rate, but still is second highest in the country.

The rate for Respiratory Diseases is 136.8, which is only slightly above the rate of 134.6 experienced last week. A year ago the rate was 196; it is seen that the curve for respiratory disease is continuing to run well below that of 1945, despite the recent increase in admissions for all causes. The 9th District, however, with its high current rate for all causes, has a rate for respiratory disease of 275, which is 50 per cent higher than the second highest district. A significant increase is reported from the 1st and 11th Districts this week. The chief improvement was reported by the 5th District where the rate dropped from 220.6 to 183.3. The lowest rate, 40.3, is reported from the Potomac and Severn River Commands.

INFLUENZA AND CATARRHAL FEVER, ACUTE. The rate for these diseases is steady, this week's figure of 65.7 comparing with 66.2 last week. Last year the rate was 128, or nearly double the current experience. Among the districts the rates for these diseases maintain a fairly close parallel with rates for total Respiratory Diseases, approximating 50 per cent of the latter figure. The 9th District is highest with 119, which is 3 per cent lower than last week's report; while the Potomac and Severn River Commands are lowest with 19.7, representing a 40 per cent improvement over last week. Decreases of from 18 per cent to 38 per cent were also reported from the 4th, 5th, 8th, and 13th Districts, while increased rates of equivalent degree were experienced in the remaining districts.

PNEUMONIA, BRONCHO AND LOBAR. These diseases remain at the rate of 1.4 as compared with 1.3 last week and 2.0 a year ago. Only five districts report any incidence. The 3rd District is highest, with a rate of 3.9.

PNEUMONIA, ATYPICAL. The rate for this disease is 1.6 as compared with 0.7 last week and 2.0 last year. While the current rate is more than double that of last week, the total number of cases involved is so small as not to be alarming. The cases were distributed through eight of the districts, with the highest rate, 3.8, occurring in the 12th District.

TONSILLITIS AND PHARYNGITIS, ACUTE. The 3 per cent increase in rate for these diseases brings the current figure to 68.1 as compared with 66.4 last week and 63 for the corresponding period of 1945. The 9th District is highest, with a rate of 150.2, which represents a 7 per cent increase over the previous week. The 5th District is second highest, but there the rate has fallen 9 per cent to 93.6. The River Commands report the lowest rate, 20.7.

SCARLET FEVER. There is a further slight decline in the rate for this disease to 8.0, from last week's rate of 8.5. The rate a year ago was 16. Ninety per cent of all cases are concentrated in the 5th, 9th, and 11th Districts, and each of these districts shows an improvement this week. The 12th District shows an increase from 0.8 last week to 4.7 for the current period.

MEASLES. There is an improvement in the rate for this disease, with a drop of 27 per cent from the previous level of 9.2 to 6.7 for this week. The rate last year was 2.0. The 11th District alone maintains its former high level of 29.2, in contrast with significant reductions in most of the other districts.
